Issue #3
May 2006

Thank you for your kind support as we are here again to bring you the latest issue of our Product Update newsletter. We certainly hope that the first two issues have been useful to you and your company.

To avoid any further delay, for all who have been waiting patiently for this issue, we hereby introduce to you the Telemecanique - Easy usage Tower Lights, Omron's latest PLC Expansion and Input units, and the latest addition to the hot selling E3T sensor Family.

Brief content of this issue:

- 1) Telemecanique XVM - Indicator Banks aka Tower Lights
- 2) Omron CPM1A - New Expansion Units
- 3) Omron CJ1 - New Temperature Input Units
- 4) Omron E3T - New Addition to E3T Sensor Family

* Telemecanique Harmony Type XVM - Indicator Banks

The latest Indicator Banks aka Tower Lights from Telemecanique offers superior quality at competitive price.

The Harmony Type XVM Series Dia. 45mm is available in the following configuration,

- 2, 3, 4 Illuminated Units.
- With or Without Buzzer
- LED, Bulb or Discharge Tube

*Pre-assembled, pre-cabled and fitted with a fixing base mounted on a bracket for vertical mounting on their support for easy usage!

*Also available as separate components for customized assembly to suit your requirements!

Take a look at its features here ->

http://www.telemecanique.com/en/products/index_fon4_fam4_dial_harmxvm.htm

* Omron CPM1A - New Expansion Units

The CPM1A also provides flexibility in I/O capacity ranging from 10 to 100 I/O points. The CPM1A can replace relay control, help distribute I/O, work as a miniature machine controller, sensor controller, or fill many other vital roles in factory automation.

Omron has recently added new model of Expansion units to provide more flexibility in I/O configuration.

Description

CPM1A-40EDR - 24 IN , 16 Relay OUT

CPM1A-40EDT - 24 IN , 16 NPN Transistor OUT

CPM1A-40EDT1 - 24 IN , 16 PNP Transistor OUT

CPM1A-AD041 - 4 Analog IN (-10-10V, 0-10V,1-5V,0-5V,0-20mA,4-20mA)

CPM1A-DA041 - 4 Analog OUT (-10-10V, 0-10V,1-5V,0-20mA,4-20mA)

Feel free to contact us for more information.

* Omron CJ1 - New Input Units

Two new Temperature Input cards have been added to the series.

CJ1W-TS561 - 6 channels input unit for K-type and J-type thermocouples.

CJ1W-TS562 - 6 channels input unit for Pt100 and Pt1000 RTD's.

Both the new units can be installed in any CJ1-series PLC system. Classified as a basic I/O unit, occupying 48, 64 or 96 I/O points depending on the number of activated inputs.

Feel free to contact us for more information.

* Omron E3T - New Addition to E3T Sensor Family

Last but not least, the latest addition to the E3T Sensor Family, the Slimmest BGS (Background Suppression) Reflective Photoelectric Sensor in the World!

E3T-FL - Ultra Slim at 3.5mm.

Rated Sensing Distance at 15mm

Detect Black at 12mm

Not affected by white background at 20mm.
