Issue #5
June 2006

Greetings from Precicon! It's the mid year season again but this time round we have the World cup fever!
Get plenty of rests because you will definitely need it throughout the tournament for its midnight's matches.
What we are offering in this issue #5 are simple, safe, efficient products, which will help in preventing or assist in any cases of unforeseen accidents or circumstances. Of course we definitely do not wish to have any of that happening, so prevention is always better than cure.

Brief content of this issue:

- 1) Omron NT21 series Touch screen - Simple Human Machine Interface (HMI)
- 2) Omron E5CS and E5CSZ - New 48 x 48mm size Temperature Controller
- 3) Omron S8VM - Latest Power Supply With New Under-voltage Alarm Function
- 4) Omron F3SJ - Cost-effective Safety Curtain Sensor series

*Omron Simple Human Machine Interface (HMI) - NT21 series Touch screen

Have you ever been bothered by too many switches on your control panel?
Have you ever been troubled by the down time in your work to learn the function of the different alarms?
Are you looking forward to have information, data, status of your machine and process at your fingertip?
Looking for a simple, easy and cost effective user interface?

If your answer is yes to most of the questions above, then LOOK NO FURTHER!

Your search is over as we are pleased to present to you our easy programmable 5" touch screen HMI, NT21. (Not to mention low cost!)

- Easy programmable touch buttons for controlling your process and displaying of status.
- Customized, Detail description of Alarms display as in History and summary format.
- Recipe function to store multiple products/processes parameters
- Hundreds pages of display, controls available at a touch of a finger!
