

Education Training Kit

Electric Installation Safety Measurement Trainer / EIS-2000

- The ideal tool for engineering, training and the simulation of measurement on electrical installations
- Fault simulation of electric installations and demonstration of actual measurements
- Education of electrical installations and education of measuring instrument usage

► Electrical installation system training

1-Phase, 3-phase, 3-phase 4 wire (R/S/T/N)

► Measurement training

AC voltage, earth resistance, earth voltage, phase insulation resistance, phase test, live line test, resistance by leakage current, capacitance by leakage current, DC volt.

► Fault simulation

ELB training, circuit-breaker training, leakage current variable test, earth resistance variable test, loop test, RCD protection switch test, battery voltage test, and etc.

Education Training Kit

Solar Generation System CP-S110

Features

- Real-time educational training system.
- Designed to enable the user to understand the principal of solar generation, solar cell, power converter, and solar generation system and to make experiments of solar generating structure and operation.
- Designed to enable the user to use easily as system diagram is attached with voltmeter and ammeter on every measurement area.

Wind & Solar Generating Trainer CP-WS300

Features

- Wind Generating Trainer was designed for the easy experiment and practice, as a wind and solar generating system.
- Software can be linked with of Wind Generating Trainer and the user can monitor data such as the output current and power of temperature, wind speed, wind generating, solar generating, battery voltage, load current, and etc.

Education Training Kit

Pneumatic Control Trainer CPE-PN2000

Features

- Consisted of various kinds of electric pneumatic components.
- Possible to practice by Relay and PLC.
- One-touch button and separable by fixing parts with lever type.
- Effective space use by the vertical and horizontal direction change.
- Providing various optional modules.
- Application practice of various air pressure components for FMS.

Industrial Control and Sensing System TKIT-ICAS01-08-R1

Features

- The training kit focus on providing the trainee with full visualization of a simulated automation application.
- Trainee will be able to appreciate from the kit how controllers, sensors and motor system works together to provide a fully automatic control solution.
- The interactive touchscreen adds another level of learning where the trainee will learn about Human and Machine interface.

Education Training Kit

Factory Automatic Trainer / CPE-AT8030

Features

- Air pressure and electrical air pressure practice.
- Possible to train with every module individually.
- Ø4 fitting connection.
- Possible to train with all modules generally.
- Used DC power for the safety of control signal.

Module

1) Line movement: CPE-AT8030-01

2) Conveyor & searatuib: CPE-AT8030-02

Linear movement to load and Unload the work

Conveyance and separation of the work

3) Conveyor: CPE-AT8030-03

4) Pick & Place: CPE-AT8030-04

Conveyance and inspection of the work.

Conveyance and inspection of the work.
