

EcoStruxure™ Energy Hub

features simple-to-use, *cloud-based software* to address the energy challenges faced by commercial and industrial building professionals. It enables you to instantly access your data from anywhere to monitor a single building or a portfolio of buildings.

EcoStruxure™ Panel Server

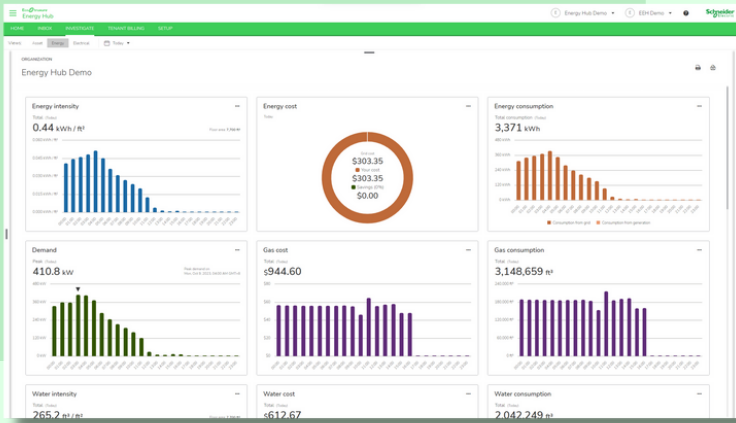

is *all-in-one gateway* with built-in webpages software that enables a variety of our EcoStruxure solutions to protect, maximize and optimize your power system. It provides a seamless connection from wireless and wired smart IoT devices to edge control software and digital services.

EcoStruxure™ Power Monitoring Expert

is purpose-built *local network software* to simplify the management of complex power systems. It takes full advantage of IoT connectivity and distributed intelligence to help maximize your uptime and operational efficiency. It gives insight into electrical system health and energy efficiency so you can make informed decisions to improve performance.

Energy Hub

- Build for Small & Medium Scale Enterprise
- Cloud-based
- Automatic dashboard creation
- Scalable from Single to Multiple-sites
- Drag-and-drop configuration in a matter of hours
- Alarm Notification on Abnormalities

Hosted in a secure ISO27001-certified data centre

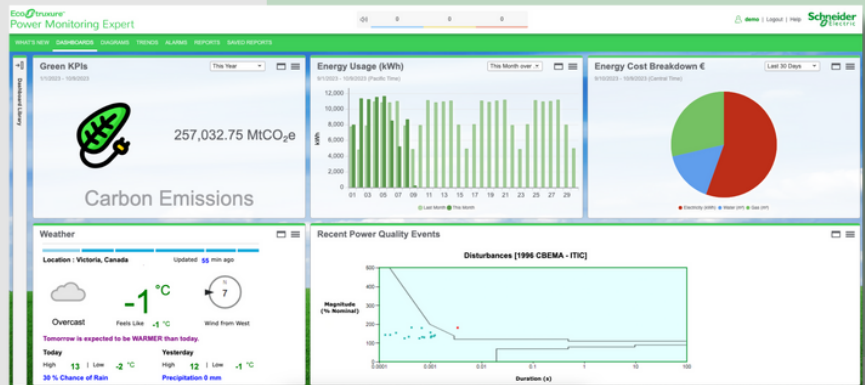

Gateways compliant with IEC 62443 4-1 for secure product development lifecycle

IEC 62443 4-2 for technical security of system components

Power Monitoring Expert

- Build for Large Scale Enterprise
- Local server network
- Customisable dashboard layout
- Scalable from Single to Multiple-sites
- Track and optimize energy usage on equipment performance
- Report KPIs and uncover energy savings opportunities

Energy Efficiency and Green Building Standards (ISO50001/2, SEP, LEED, NABERS)

Verify utility/grid service and internal compliance to power quality standards (EN50160, IEEE519, ITIC)

Cybersecurity compliant (IEC 62443 4-1 and 4-2 SL1 Certified)

📍 63 Hillview Avenue, #10-21
Lam Soon Industrial Building, Singapore 669569
