1D / 2D Symbols and Direct Part Marks

Linear (1D) barcodes have been in commercial use since the 1970s and are the most common symbologies used for automatic identification. Increasing numbers of manufacturers are using two-dimensional (2D) symbols, such as Data Matrix, that offer greater placement flexibility and increased data capacity.

Machine-readable symbols generally fall into the categories of linear barcodes, stacked symbols, 2D symbols and Optical Character Recognition (OCR) fonts.

OMRON Microscan provides fast, reliable reading solutions for 1D and 2D Symbology Standards in the right and OCR. Our products read any linear barcodes or 2D symbols printed or marked by any means, and verify them to industry standards.

Note: OMRON's F430-F and F420-F Smart Cameras provide Optical Character Recognition (OCR). The code readers in this catalog do not provide OCR.

DIRECT PART MARKS

Direct part marks (DPM) are typically 2D Data Matrix symbols permanently marked by such methods as dot peen or laser / chemical etch onto substrates including metal, plastic, rubber or glass. OMRON Microscan offers a comprehensive family of readers and verifiers with illumination and decode algorithms specifically designed for difficult direct part marks.

Barcode Verification and Label Inspection

Legible, accurate barcodes and text have never been more important than they are today. Inconsistencies in print quality can lead to process inefficiencies and downtime; unreadable barcodes may require re-labeling, re-scanning, or even manual entry of critical information by a human operator.

Inconsistent quality may also result in expensive vendor non-compliance fines and other penalties, plus damage the labeled product's perceived quality.

Readability of barcodes is determined by how well a barcode reader can decode the data stored in the symbol.

Understanding the primary reasons for decoding failures can save operators valuable time and effort when diagnosing reading issues. Once the cause of barcode unreadability is defined, it can be addressed by taking simple, preventative measures.

OMRON Microscan's barcode verifiers are embedded solutions that include camera, software, and precision illumination specifically designed for the verification of 1D / 2D codes and direct part marks to ISO / IEC standards.

Benefits of Barcode Verification Systems

- Comply with symbol quality industry standards and directives
- Maximize efficiency of your manufacturing process
- Control quality in real time as you verify the output from your printer or code marking equipment
- Minimize returned goods due to bad labels
- Increase customer satisfaction
- Produce informative verification reports

THE IMPORTANCE OF VERIFICATION

Automated data capture is critical to a company's success, and the results of scanning failure can have a serious impact. Without verification, bad barcodes are not identified until they are unreadable. By the time a bad barcode is identified, thousands of poor-quality barcodes may have already escaped down the line. With verification, bad barcodes are prevented from being applied to the product, eliminating the chance for future failures.

Multi Code Readers

OMRON Microscan's multi code readers combine compact, easy-to-embed design with the ability to read 2D codes and linear barcodes. They also provide reliable reading of direct part marks (DPM) that are being increasingly used to meet growing demands for traceability.

Laser Barcode Readers

From small products for embedded OEM applications to rugged readers for industrial manufacturing environments, OMRON Microscan offers a wide range of quality products to read linear barcodes and stacked symbols, with features such as high-speed decoding, wide field of view, symbol reconstruction and aggressive decode algorithms.

MS-3 series

Compact raster laser barcode reader offers high-performance decoding and wide scan angle at close range.

QX-830 series

Compact laser barcode reader features QX platform, symbol reconstruction and Ethernet protocols.

QX-870 series

Programmable sweeping raster laser barcode reader with QX platform, symbol reconstruction and Ethernet protocols.

Barcode Verification Systems

OMRON Microscan's LVS® Barcode Verifiers are fully-integrated off-line solutions designed for the verification of 1D and 2D symbols and direct part marks to application standards such as GS1, HIBC, USPS and ISO / IEC 15415 / 15416. Barcode Verification Kits offer flexible integration options for off-line to symbology standards or user-defined parameters.

LVS-9510 series

All-in-one desktop verifier for off-line ISO / IEC barcode verification.

LVS-958 series

All-in-one handheld verifier for flexible verification of multiple printed 1D / 2D symbols and direct part marks (DPM). Can be used with a tablet for portability.

Auto Focus Multi Code Reader

MicroHAWK V430-F series

Auto Focus Multi Code Reader

The new V430-F Series offers advanced decode algorithms and improved ruggedness. The long-range model for long-distance reading and improved light model ideal for DPM expand the range of auto focus multi code readers.

Refer to the V430-F series datasheet (Cat. No. Q274) for details.

Long life autofocus

Liquid lens for unlimited autofocus

Code readers using a mechanical focus mechanism generally break due to deterioration of the drive mechanism or motor when they perform autofocus tens of thousands of times. The V430-F Series, on the other hand, uses a liquid lens that does not need a drive mechanism or motor, providing unlimited autofocus and long life.

The liquid lens can flexibly change its focal length by applying voltage to change the internal oil and water shape. (a in right figure) In addition, the V430-F Series precisely focuses on objects using the code search algorithm. (b in right figure)

No worry about breakdown even when distance to code varies due to frequent changeover

Auto Focus Multi Code Reader

MicroHAWK V420-F series

Auto Focus Multi Code Reader

The MicroHAWK V420-F Auto Focus Multi Code Reader has the same reading ability as the MicroHAWK V430-F Series but different communication interfaces.

- RS-232, USB, Ethernet Over USB
- IP54 Enclosure

• See the V430-F Series on page 6 for the common features.
Refer to the V420-F series datasheet (Cat. No. Q275) for details.

C-Mount Code Reader

The new V440-F Series offers advanced decode algorithms and improved data output configuration especially for Matrix sorting. The V440-F expands on the strength of V430-F platform with high resolution sensor and C-mount lens for wider configuration of WD & FOV.

Refer to the V440-F series datasheet (Cat. No. Q342) for details.

5 M pixel with C mount lens powerful for your small code reading

Not many code reader supplier offers larger than 3 Mpix line up. This results in using complex vision system with higher resolution camera to read small code.

V440-F offers better imaging by its 5 M resolution with telecentric lens.

V440-F, No Optics, 5 MP, Mono, No Light, X-Mode *2	V440-FXXX50M-NNX

Note 1: V440-F readers are sold without lenses, lights, cables, or mounting. All of these items can be found in later sections of this datasheet.

Note 2: The V440-F uses all the same cables and interconnect accessories as the MicroHAWK V430-F, with the exception of the M12 Ethernet cables. The V440-F uses standard Ethernet cables. High-Flex TPE cables and Robot Ethernet cables are shown later in this datasheet

*1. Plus Mode is suitable for high contrast codes such as labels.

*2. X-Mode is suitable for low print grade codes and DPM.

Industrial Handheld DPM Reader

V460-H

An Intelligent Barcode Reader for Direct Part Marks and Labels

Alcohol-
disinfectable^{*1}

The V460-H Industrial Handheld DPM Reader offers an intuitive out-of-box reading experience, as well as seamless PLC connectivity via the Power over Ethernet (PoE) port.

Its durable and long-lasting body ensures reliable performance in rugged environments.

Predictive Autofocus

Automatically adjusts focus for barcodes at different distances.

Consistent reading of DPM X-mode decode algorithms

While traceability requires 100% reading of every part marked, variations in barcode size, surface texture, and reflectivity can make reading direct part marks a significant challenge. X-Mode algorithms ensure that all direct part marks can be read as easily as a printed label.

"Auto-Everything": Just click and read

This intelligent handheld allows easy reading of a very broad range of challenging DPM and labels with variable code densities, sizes, part geometries, surface conditions, and working distances without any user adjustment in a wide variety of traceability applications.

Rugged design exceeding IEC test requirements

The V460 is a ruggedized handheld designed for long life in industrial situations.

The barcode reader is built to withstand the harsh treatment of the manufacturing environment. Thanks to the V460's longevity, you can dramatically reduce the cost of repairing or replacing your barcode readers.

Durability

- Drop Test: 50 drops from 2 m
- Tumble Test: 3,000 tumbles at 1 m (IEC 60068-2-31: 1,000 tumbles at 1 m)

Environmental immunity

- IP Rating: IP65
- Industrial Fluid Resistance: Motor/engine oil, automatic transmission fluid (ATF), continuously variable transmission fluid (CVT), industrial degreaser (Engine Brite Heavy Duty), brake fluid (DOT4)

*1. Use isopropyl alcohol 70%.

Read Ranges

Field of View

**Note:**

The recess value of 49.85 mm is a calculated distance from the reader's front face to the theoretical center of the imager engine optics inside the reader. The working distance to a part being imaged from the front of the reader and the recess value are added together for the FOV area calculation.

FOV Formula:

$$\text{Range} = 2 \times (\text{WD} + \text{Recess}) \times \tan(\theta/2)$$

*1. The working distance is measured from the front face of the reader to the part being imaged.

Handheld DPM Code Reader

V450-H series

“Ultra-Rugged” Handheld DPM Code Reader

Alcohol-
disinfectable^{*1}

The V450-H Ultra-Rugged Handheld DPM Code Reader is Omron Microscan's newest generation of industrial Direct Part Mark (DPM) handheld code reader, purpose built from the ground up to set new standards for durability and performance. The alcohol-disinfectable body makes the code readers safe for use in production sites where infection measures are required.

Our unique reading algorithms “X-Mode” allow you to also read the DPM codes on low-contrast materials and curved materials.

Outstanding ruggedness

Its tested durability and environmental immunity ensure reliability.

Durability

- Drop Test: Multiple 2.4 m drops to concrete (Wireless type)
- Tumble Test: 5,000 tumbles at 1 m

Environmental immunity

- IP Rating: IP65/IP67
- Industrial Fluid Resistance
 - Motor/Engine Oil
 - Automatic Transmission Fluid (ATF)
 - Continuously Variable Transmission Fluid (CVT)
 - Industrial De-Greaser
 - Brake Fluid (DOT4)

Consistent reading of DPM X-mode decode algorithms

Reliable reading despite inconsistent print quality

The V450-H Series includes our unique and robust X-Mode decoding algorithms. Expanded X-Mode decoding algorithms can reliably read distorted and damaged codes by correcting variations in print quality.

Damaged Mode

Corrects damaged 2D codes.

**Morphology**

Enhances the contrast of cells.

**Scale Up**

Scales up the captured image to the ideal size.

**Scale Down**

Scales down the captured image to the ideal size.

Consistent reading of DataMatrix of 3 mm square^{*2}

Indirect illumination:
outer edge part is lit

Direct illumination:
center part is lit

In addition to high resolution, two patterns of direct/indirect illumination appropriate for DPM codes are adopted, allowing consistent reading of the DPM codes marked on a variety of material surfaces.

*1. Use isopropyl alcohol 70%.

*2. DataMatrix: 0.1016 mm at minimum resolution

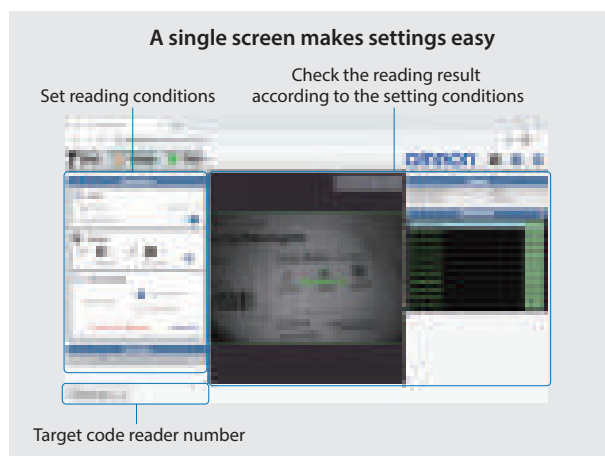

Handheld DPM Code Reader V450-H series

Code reader loss-prevention function (in cradle for wireless model)

For the wireless type, the code reader can emit a sound when the paging button on the cradle is pressed. The code reader can be easily located by the sound, thereby preventing misplacement or loss.

Easy setup with WebLink_{PC}

Easy setup with PC setup tool WebLink_{PC}. Setting most commonly used reading conditions and checking reading result are possible on a single screen, providing efficient setting.

Notification with a beep sound, a display indicator, and vibration

In addition to a beeper, visual and vibrating indicators provide silent confirmation of successful reads for noisy or sensitive environments.

When using the HS-360 series

HS-360X series have been discontinued at June 2023.

Handheld Code Reader

V410-H series**Handheld High-performance Code Reader**

Alcohol-
disinfectable^{*1}

Versatile, powerful decode performance for any application.

The alcohol-disinfectable body makes the code readers safe for use in production sites where infection measures are required.

Product lineup includes: SR type, which has a wide reading range for easy alignment of the code reader with a code, XD type capable of consistently reading small codes thanks to high resolution and X-Mode decoding algorithms, and HC type, which is resistant to strong disinfectants used in the medical field.

^{*1}. Use isopropyl alcohol 70% for XD/SR type.
In addition isopropyl alcohol, sodium hypochlorite and hydrogen peroxide solution can be used with HC type.

Work efficiency improvement**A wide reading view allows alignment easy****SR type**

SR type provides easy alignment of a code reader with a code by its wide reading range and reading distance. Efficient manual code reading is possible.

The X-Mode equipped**Consistent reading at high resolution for small codes****XD type**

XD type equips with OMRON's unique X-Mode algorithms realizing high DPM (Direct Part Marks) readings. It consistently reads small codes and distorted codes at a high decode rate.

Effective against infectious diseases**HC type**

HC type can be used with the major disinfecting chemicals used in medical institutions.

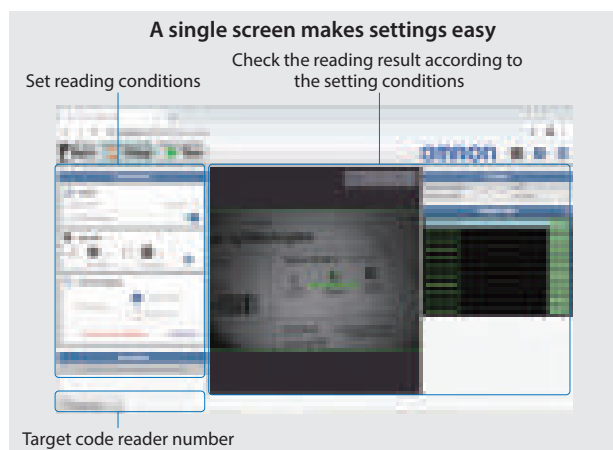

Unlike antibacterial types, which suppress the growth of bacteria, it can be disinfected by chemicals, thus minimizing the risk of infection. It is a safe design that fills the gaps and screw holes where bacteria and viruses are likely to evade disinfection.

Chemical resistance to:	Wipe disinfection
Sodium hypochlorite	OK (can be wiped down)
Isopropyl alcohol	OK (can be wiped down)
Hydrogen peroxide solution	OK (can be wiped down)

Ease of Use - WebLinkPC

SR type / XD type

Easy setup with PC setup tool WebLinkPC. Setting most commonly used reading conditions and checking reading result are possible on a single screen, providing efficient setting.

Notification with a beep sound, a display indicator, and vibration

SR type / XD type

In addition to a beeper, visual and vibrating indicators provide silent confirmation of successful reads for noisy or sensitive environments.

HC type

Day and night 'do-not-disturb' modes for scanner feedback, allowing users to mix and match between a visual (red and green LED), haptic (vibration) and audio (audible "beep" tone).

Laser Barcode Reader

MS-3 series**Ultra-Compact
Laser Barcode Reader**

The MS-3 laser barcode reader offers the fastest read performance* in embedded compact bar code readers. The wide scan angle of 70 degrees is coupled with ultra-compact size and flexible mounting.

High performance and flexibility make the MS-3 the optimal choice for reliable reading in embedded instruments.

*Based on Omron investigation in march 2018.

MS-3: At a Glance

- Decodes / second: up to 1000
- Read Range: 51 to 254 mm
- Wide Scan Angle
- IP54 Enclosure

ESP® Easy Setup Program: Single-point software provides quick and easy setup and configuration of all OMRON Microscan readers.

EZ Button: This performs reader setup and configuration with no computer required.

Compact & Lightweight

44.5 mm square by 21.6 mm tall code reader weighs only 57 g for easy mounting onto robotic equipment or into tight spaces.

High Scan Speed

Adjustable scan speed from 300 up to 1000 decodes per second and OMRON Microscan's world-class decode algorithms ensure accurate reading every time.

Wide Scan Angle

The wide scan angle of over 70 degrees and a factory customizable focal point add up to space savings within your system, allowing greater flexibility with positioning.

Visible Indicators

Illuminated LEDs on top of the code reader provide visual confirmation of the code reader performance.

Real-time Controls

The inputs include a trigger signal, a "new master" input, and a programmable input for resetting counters or releasing outputs. The outputs can be configured to activate upon a variety of conditions including matchcode and diagnostic operations.

Application Examples

- Clinical instruments
- Bank ATMs
- Parking kiosks
- Point-of-sale terminals
- Robotics

Laser Barcode Reader

QX-830 series**Compact Industrial Laser Barcode Reader**

The QX-830 laser barcode reader combines flexible connectivity with high performance decoding capabilities to reliably read 1D barcodes in almost any automation environment. In addition to the Quick Connect System and X-Mode Technology, the QX-830 features IP54 industrial sealing and optional embedded Ethernet protocols.

High performance, simple connectivity, and the highest quality enclosure make the QX-830 an ideal laser barcode reader for any industrial application.

QX-830: At a Glance

- Scans / second: 300 to 1400
- Read Range: 25 to 762 mm
- Optional Embedded Ethernet TCP / IP & EtherNet / IP
- IP54 Enclosure

ESP®Easy Setup Program: Single-point software solution provides quick and easy setup and configuration of all OMRON Microscan readers.

EZ Button: This performs reader setup and configuration with no computer required.

Visible Indicators: Performance indicators include "good read" green flash and LEDs.

QX Platform: Quick Connect system and X-Mode technology combine to provide simple connectivity, networking, and high performance decoding.

**Quick Connect System**

- Plug and play setup
- Single or multi-code reader solutions

X-Mode Technology

- Decodes damaged, poorly printed, or misaligned codes
- Ensures high read rates and throughput

High Performance

Aggressive decoding capabilities allow reliable reading of barcodes out to 762 mm, at up to a 254 mm beam width.

Flexibility

The compact size of the QX-830 allows flexible positioning for a variety of applications.

Application Examples

- Any industrial environment from light to heavy duty
- Conveyor lines
- Packaging and sortation
- Electronics production
- Embedded within machinery

Real-time Feedback

Visible LED indicators on the side of the code reader and a "good read" green flash projecting from the front window provide confirmation of the code reader's performance. The green flash is visible within a complete 360 degree radius from the code reader.

Laser Barcode Reader

QX-870 series

Industrial Raster Laser Barcode Reader

The QX-870 laser barcode reader partners the latest technologies in barcode reading and connectivity into an easy to use solution for barcode track, trace and control applications. Simple to set up and deploy, it features a programmable sweeping raster to read multiple codes, in varying locations, even if they are damaged or mis-aligned.

With plug and play setup and the most aggressive decode algorithms available, the QX-870 is an ideal laser barcode reader for any industrial application.

QX-870: At a Glance

- Scans / second: 300 to 1400
- Read Range: 25 to 762 mm
- Optional Embedded Ethernet TCP / IP & EtherNet / IP
- IP65 Enclosure

ESP®Easy Setup Program: Single-point software solution provides quick and easy setup and configuration of all OMRON Microscan readers.

EZ Button: This performs reader setup and configuration with no computer required.

Visible Indicators: Performance indicators include "good read" green flash and LEDs.

Sweeping Raster: This programmable feature enables the reader for multiple symbols at varying distances and locations.

QX Platform: Quick Connect system and X-Mode technology combine to provide simple connectivity, networking, and high performance decoding.

**Quick Connect System**

- Plug and play setup
- Single or multi-reader solutions

X-Mode Technology

- Decodes damaged, poorly printed, or misaligned codes
- Ensures high read rates and throughput

High Performance

Aggressive decoding capabilities allow reliable reading of barcodes out to 762 mm, at up to a 254 mm beam width.

Ethernet Protocols

The QX-870 includes optional embedded Ethernet TCP / IP and EtherNet / IP for high speed communication.

Intelligent Raster

In addition to sweep angle and speed controls, the QX-870 features a programmable raster with intelligent auto framing technology. Advanced software will automatically frame the raster height and width of the laser to match the barcode, allowing selective targeting of codes within a single read cycle.

Application Examples

- Any industrial environment from light to heavy duty
- Automotive assembly
- Packaging and sortation
- Electronics production
- Embedded within machinery

Code Verification System

LVS-9510 series

Desktop Barcode Verification System

Comes with handheld top cover (not shown) to keep label in position on viewing window.

The LVS-9510 is a high-performance system for off-line verification of barcodes to ISO / IEC, ANSI, GS1, and UDI standards.

The LVS-9510 is unique in the world of ISO verification due to its ease of use and ability to verify linear (1D) and two-dimensional (2D) codes without any change of equipment. The system automatically determines the symbology and aperture needed to evaluate the code and identifies and highlights trouble spots.

The LVS-9510 offers a "stitching" feature that allows grading of barcodes that are larger than the field of view.

LVS-9510: At a Glance

- Validates to ISO / IEC, ANSI, GS1, and UDI print quality standards.
- Software upgrade options include Multi-Sector for verification of multiple barcodes on a label.
- 21 CFR Part 11 compliant-ready.
- Certified by GS1 US.
- Supports 19 languages.
- Quality data reporting for auditing purposes.
- Manage operator permissions using LVS-95XX software or using Microsoft Active Directory.
- Includes NIST-Traceable Calibrated Conformance Standard Test Card for calibrating the system.
- Save verification reports to PDF.

ISO / ANSI for 1D

LVS-95XX series barcode verifiers inspect all nine ISO / ANSI parameters for linear (1D) barcodes, have the ability to identify blemishes, and can perform simple human-readable validation.

ISO / ANSI for 2D

The LVS-95XX series verifies 2D codes and reports all parameters as specified in the applicable symbology specification.

Software Upgrade: EAIV

The Enhanced Application Identifier Verification (EAIV) option verifies that all GS1 Application Identifiers, such as Expiration Date, Global Trade Item Number (GTIN), and Batch Number, embedded in the data structure of a GS1 barcode match the data programmed in the EAIV feature by the user.

User Permission Options

Manage permissions through LVS-95XX software: Passwords are stored in a local database. All passwords are encrypted, include an expiration date, and count failed password attempts.

Analytical Tools

Equipped with numerous analytical tools to identify and evaluate barcode errors. Problems are color-coded to make problem solving easy.

Software

LVS-95XX software includes GS1 System Symbol Specification Tables. GS1 tables set standards for barcode data structure and how to maintain the quality of codes during barcode creation. OMRON Microscan offers an online training course on GS1 tables and how these apply to different organizations.

Manage permissions through Microsoft Active Directory: User privileges are based on Microsoft authentication and LVS-95XX permissions are assigned based on group membership.

Code Verification System

LVS-9585 series

Portable Barcode Verification System

The LVS-9585 is a high-performance handheld solution for off-line barcode verification to ISO / IEC, ANSI, and GS1 standards. Featuring a high-resolution 5.0 megapixel camera, the LVS-9585 reads and analyzes linear (1D) and two-dimensional (2D) codes up to 76.19 mm wide and up to 57.15 mm tall. 1D and 2D direct part marks (DPM) of up to 44 mm x 44 mm can be verified to MIL-STD-130, ISO, and GS1 standards.

The LVS-9585 verifies multiple symbologies, including any combination of linear, 2D (Data Matrix, QR Code, and Aztec Code), and stacked linear (PDF417, MicroPDF, and Composite codes).

Powered by a 2.0 m USB 2.0 cable, the LVS-9585 verifies barcodes on a wide range of surfaces including plastics, PCBs, metal, cardboard, and shipping containers.

LVS-9585: At a Glance

- Verify a broad variety of direct part marks as well as 1D and 2D printed barcodes with a single model.
- Software automatically selects best lighting performance from integrated red or white dome and 30° angle lighting.
- Validates printed barcodes to ISO / IEC, ANSI, GS1, and UDI print quality standards.
- Validates direct part marks (DPM) to ISO, MIL-STD-130, and GS1 standards.
- Software options include Multi-Sector for verification of multiple barcodes and GS1 AI content check.
- 21 CFR Part 11 compliant-ready.
- Supports 19 languages.
- Export verification reports to Excel or SQL database.
- Save verification reports to PDF.
- Includes NIST-Traceable Calibrated Conformance Standard Test Card for calibrating the system.

Terms and Conditions Agreement

Read and understand this catalog.

Please read and understand this catalog before purchasing the products. Please consult your OMRON representative if you have any questions or comments.

Warranties.

(a) Exclusive Warranty. Omron's exclusive warranty is that the Products will be free from defects in materials and workmanship for a period of twelve months from the date of sale by Omron (or such other period expressed in writing by Omron). Omron disclaims all other warranties, express or implied.

(b) Limitations. OMRON MAKES NO WARRANTY OR REPRESENTATION, EXPRESS OR IMPLIED, ABOUT NON-INFRINGEMENT, MERCHANTABILITY OR FITNESS FOR A PARTICULAR PURPOSE OF THE PRODUCTS. BUYER ACKNOWLEDGES THAT IT ALONE HAS DETERMINED THAT THE PRODUCTS WILL SUITABLY MEET THE REQUIREMENTS OF THEIR INTENDED USE.

Omron further disclaims all warranties and responsibility of any type for claims or expenses based on infringement by the Products or otherwise of any intellectual property right. (c) Buyer Remedy. Omron's sole obligation hereunder shall be, at Omron's election, to (i) replace (in the form originally shipped with Buyer responsible for labor charges for removal or replacement thereof) the non-complying Product, (ii) repair the non-complying Product, or (iii) repay or credit Buyer an amount equal to the purchase price of the non-complying Product; provided that in no event shall Omron be responsible for warranty, repair, indemnity or any other claims or expenses regarding the Products unless Omron's analysis confirms that the Products were properly handled, stored, installed and maintained and not subject to contamination, abuse, misuse or inappropriate modification. Return of any Products by Buyer must be approved in writing by Omron before shipment. Omron Companies shall not be liable for the suitability or unsuitability or the results from the use of Products in combination with any electrical or electronic components, circuits, system assemblies or any other materials or substances or environments. Any advice, recommendations or information given orally or in writing, are not to be construed as an amendment or addition to the above warranty.

See <http://www.omron.com/global/> or contact your Omron representative for published information.

Limitation on Liability; Etc.

OMRON COMPANIES SHALL NOT BE LIABLE FOR SPECIAL, INDIRECT, INCIDENTAL, OR CONSEQUENTIAL DAMAGES, LOSS OF PROFITS OR PRODUCTION OR COMMERCIAL LOSS IN ANY WAY CONNECTED WITH THE PRODUCTS, WHETHER SUCH CLAIM IS BASED IN CONTRACT, WARRANTY, NEGLIGENCE OR STRICT LIABILITY.

Further, in no event shall liability of Omron Companies exceed the individual price of the Product on which liability is asserted.

Suitability of Use.

Omron Companies shall not be responsible for conformity with any standards, codes or regulations which apply to the combination of the Product in the Buyer's application or use of the Product. At Buyer's request, Omron will provide applicable third party certification documents identifying ratings and limitations of use which apply to the Product. This information by itself is not sufficient for a complete determination of the suitability of the Product in combination with the end product, machine, system, or other application or use. Buyer shall be solely responsible for determining appropriateness of the particular Product with respect to Buyer's application, product or system. Buyer shall take application responsibility in all cases.

NEVER USE THE PRODUCT FOR AN APPLICATION INVOLVING SERIOUS RISK TO LIFE OR PROPERTY OR IN LARGE QUANTITIES WITHOUT ENSURING THAT THE SYSTEM AS A WHOLE HAS BEEN DESIGNED TO ADDRESS THE RISKS, AND THAT THE OMRON PRODUCT(S) IS PROPERLY RATED AND INSTALLED FOR THE INTENDED USE WITHIN THE OVERALL EQUIPMENT OR SYSTEM.

Programmable Products.

Omron Companies shall not be responsible for the user's programming of a programmable Product, or any consequence thereof.

Performance Data.

Data presented in Omron Company websites, catalogs and other materials is provided as a guide for the user in determining suitability and does not constitute a warranty. It may represent the result of Omron's test conditions, and the user must correlate it to actual application requirements. Actual performance is subject to the Omron's Warranty and Limitations of Liability.

Change in Specifications.

Product specifications and accessories may be changed at any time based on improvements and other reasons. It is our practice to change part numbers when published ratings or features are changed, or when significant construction changes are made. However, some specifications of the Product may be changed without any notice. When in doubt, special part numbers may be assigned to fix or establish key specifications for your application. Please consult with your Omron's representative at any time to confirm actual specifications of purchased Product.

Errors and Omissions.

Information presented by Omron Companies has been checked and is believed to be accurate; however, no responsibility is assumed for clerical, typographical or proofreading errors or omissions.
